2.2. Results and discussion

The results of the present study are presented in Table 1. The first column shows the mean values of the variables measured. The second column shows the standard deviation. The third column shows the range of the variables. The fourth column shows the minimum and maximum values of the variables. The fifth column shows the minimum and maximum values of the variables. The sixth column shows the minimum and maximum values of the variables. The seventh column shows the minimum and maximum values of the variables. The eighth column shows the minimum and maximum values of the variables. The ninth column shows the minimum and maximum values of the variables. The tenth column shows the minimum and maximum values of the variables.
